Hello everyone! ☺ I'm Hades from the MOBAFire team and we've been working on improving our Teamfight Tactics resources for the new Reckoning Set update! Our main focus was updating the Item Cheat Sheet. We've added the option to switch easily between normal and shadow items, which can be viewed in a detailed or more compact way, depending on your preference. The goal of our cheat sheet is for you to be able to find out what all of the items do on the same page, making it easy to reference while in-game. We've worked hard on making the cheat sheet easy to use and to display all the information you're looking for. We're wondering if the players feel the same way, do you think the cheat sheet is easy to use, and is there any other information we should include or display differently? We'd be happy to hear your thoughts! Our team is always looking into new ways to improve our features and we could really use the input of the community! Here's the patch notes: of luck in your games everyone ~PS: Feel free to follow me and my girlfriend on Twitch :)(We mostly stream League & TFT)- www.twitch.tv/Zekrow- www.twitch.tv/MissTurtlesoup(Link to separate Champion & Item Cheat Sheets with multiple different versions at the bottom of the thread) Combo Sheet - 16x9 ish - Colored Champion Costs (9.23) - Hotfix 1 This is the result of combining/improving the many different cheat sheets I made in two other threads. (Links at the bottom) I've gone ahead and made different versions with small adjustments, pick what you find more readable :) Personal Favorites: ~~~~~ No Champion Costs | Basic: Champion Costs | White Printer Version: ~~~~~ White Champion Costs | Basic: Champion Costs | White Printer Version: ~~~~~ Colored Champion Costs | Basic: Champion Costs | White Printer Version: ~~~~~ Updated Combo Sheets to reflect the newest -TFT - Items - Cheat Sheets: - Champion / Synergies - Cheat Sheets: ~~~~~ Hope this helps ~~~~~
